

My Company provides expert witness services to law firms and attorneys representing parties in bicycle related litigation. I have devoted the past twenty-nine years to studying bicycle safety. I have taught and taken cycling safety classes and have produced a cycling safety video. My foundational cycling experience is based on a seventeen-year bicycle racing career that includes two Olympic teams, Coors Classic Champion and third American to ever compete in and finish the Tour de France. I have worked in and managed Bicycle Shops in New York, Florida, Colorado & California and attended bicycle assembly and maintenance classes.

My Expertise Includes

Analysis of the condition and maintenance of the bicycle at the time of the incident, including but not limited to, the brake cables and brake pads, the tires, the shifting mechanism and drive train, the wheels, fork seat, seat post and binder bolts. The standard of care related to the assembly and fitting of the bicycle to the consumer for the safe rider operation of the bicycle. The standard of care in terms of instructing the consumer/rider about the safe use of the bicycle and its components. The standard of care regarding the condition of bicycle and of said bicycle with respect to safety. The standard of care regarding the safe operation of the bicycle and of the said bicycle with respect to safety. The expectations of cyclists operating bicycles on the roadway and warnings posted thereon and adjacent thereto when obstructions are present on the roadway.

Bicycle Safety Affiliations

I am knowledgeable about Bicycle safety, riding awareness, and the law as it relates to the operation of bicycles and best practices through my participation in the California Bicycle Advisory Committee (CBAC) meetings and League of American Bicyclist materials and events.

California Bicycle Advisory Committee - The CBAC was run by the California Department of Transportation whose mission was to ensure that the operations of the California Department of Transportation meets the needs of those who travel by bicycle in California. The CBAC goals are to improve bicyclist safety and reduce bicyclist injuries & fatalities, and to educate & enhance the awareness of Caltrans, its workforce and the public about the needs of bicyclists. This experience exposes me to the issues and solutions private entities and bicyclist, municipalities, government agencies, manufacturers and insurance companies are faced with that are involved in bicycle accident litigation.

League of American Bicyclists - The League works to make biking better and safer from the halls of Congress to the streets of our communities. They are the voice of the nation's 57 million bicyclists, promoting and protecting bicyclist right to ride.

Education

- University of Florida, 1982 Associate of Arts
- League of American Bicyclist Safety Classes
- Barnett's Bicycle Mechanics School
- Smart Routes to School Safety Classes
- Basic Street Skills Bicycle Safety Classes for Adults
